

Announcement of Job Opportunities
Topcon Agriculture – RDS Technology
Minchinhampton, Stroud, UK
December 9, 2016

Topcon Agriculture announces the following job opportunities to be located at the RDS facility in Minchinhampton:

- **Engineering Intern:** The Engineering Intern works closely with the product development team and product management to define product requirements and assist in functional testing for the design group. We prefer candidates working towards a BSc or diploma in electrical or software engineering. Experience with Visual Studio C#, embedded C and C++, CANbus or ISO-11783 protocol will be desirable.
- **Field Test Engineer:** Key assignments in this role will include testing in support of Topcon's full line of precision agriculture equipment including GNSS Receivers, In Cab Consoles/Displays, and various Engineering Control Units. Responsibilities will include development of test plans, authoring test procedures, executing product validation and verification processes, troubleshooting problems and reporting results to sales and customer support, and interacting with other functions (i.e. Product Management, Sales, Manufacturing, etc.) to support end users. We prefer candidates with a degree in Electrical, Mechanical or Agricultural Engineering, 1-4 years of related

experience, excellent troubleshooting skills, and the ability to travel.

- **Application Engineer:** The Application Engineer works closely with the product development team and product management to fully define product requirements and to provide product level testing for the design group. Duties include defining test procedures, troubleshooting, problem resolution, and isolating technical issues and assisting in implementation of corrective actions. We prefer a BS/MS in Electrical or Software Engineering, experience in C#, C, C++ development as well as Squish GUI Tester and qTest. Experience with CANbus, ISO11783 is highly desired.
- **Human Resources/Payroll Officer:** Reporting to the Director of Human Resources, key duties will include Payroll Administration, maintaining the Human Resources Information System, Compensation and Benefits Administration, Recruiting, Employee Relations, Training and other Human Resources Generalist duties. We prefer a BS or professional qualification in Human Resources, previous experience with payroll administration and some Human Resources experience specifically in recruiting.

Interested and qualified candidates are encouraged to contact:
